

AUTOTRACK™

RADAR THAT THINKS FOR ITSELF.

AutoTrack™ brings automated tracking to our most intuitive and **easy-to-use** radar system yet, automatically detecting, tracking, and prioritizing radar targets so you don't have to. **No setup. No hassle.** Just intelligent tracking that works in the background to identify potential hazards and keep you informed no matter what screen or app you're on.

More than just a new feature, it represents a major step forward in **situational awareness**, delivering world-class radar performance without the learning curve.

Autonomous Monitoring

- Continuously analyzes every radar sweep in the background, allowing you to focus on navigating, fishing, or running the boat.
- Intelligent monitoring adapts to changing conditions and alerts you to potential hazards automatically.

Unrivalled Situational Awareness

- Tracks and prioritizes up to 50 targets simultaneously, highlighting those that pose the greatest potential risk.
- Instant alerts notify you when a high-risk object is detected.

True Ease of Use

- No setup or adjustments required. Tracking begins automatically when the radar powers on.
- Advanced radar awareness without the complexity of traditional tracking systems.

Integrated for Simplicity

- Designed to work seamlessly with Simrad® NSS®, NSX®, and NSO® displays.
- Enabled by default and always active in the background for a more intuitive, connected helping experience.

Why AutoTrack™

- Traditional radar tracking often requires manual setup and constant monitoring.
- AutoTrack eliminates that complexity by automatically detecting, tracking, and prioritizing radar targets, delivering smarter situational awareness that works in the background while you focus on running the boat.

Key Features

- Available as a free download for compatible HALO® radar users*.
- Automatically detects and tracks moving vessels and stationary targets.
- No manual setup required.
- Monitors up to 50 targets simultaneously.
- Smart filtering prioritizes potential hazards and highlights the most relevant, using a clear presentation so you can focus on what matters.
- Real-time updates ensure you're always working with accurate data.

Who AutoTrack Is For

AutoTrack is built for boaters who want strong radar awareness without managing complex settings.

Ideal for:

- Recreational boaters navigating busy waterways.
- Offshore anglers focused on fishing, not radar controls.
- Cruisers seeking added confidence in changing conditions.
- Anyone wanting advanced radar capability that's simple to use.

- Instant alert pop-ups notify you of potential hazards - even when using sonar, charts, or other apps.
- Prioritized tracking - get critical information on up to six priority targets through on-screen dynamic data boxes.
- Tracks vessels up to 24 nautical miles away.
- Compatible with NSS® and NSO® EVO3 and EVO3S displays. Optimized for the best experience on NEON™ OS devices including NSX®, NSX® ULTRAWIDE, NSS® 4, and NSO® 4.

Available on Simrad® Halo® Dome and Open Array Radars
